PROFESSIONAL SUMMARY

Computer Programming and Analysis student at Seneca Polytechnic with experience developing responsive web applications using React.js, HTML5, CSS3, JavaScript, and REST APIs. Skilled in building reusable UI components, debugging frontend applications, integrating backend services, and collaborating in Agile development environments. Proficient with Git, responsive design, and modern frontend development practices.

TECHNICAL SKILLS

- **Frontend:** React.js, HTML5, CSS3, JavaScript (ES6+), TypeScript, Tailwind CSS, Responsive Web Design, UI Component Development
- **Backend & APIs:** Node.js, Express.js, REST APIs, JWT Authentication, API Integration
- **Databases & Cloud:** MongoDB, Firestore, Firebase, MySQL, Oracle 12c, Hibernate/JPA, Vercel
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Jira, HubSpot, Microsoft Office, Linux
- **Development Practices:** Agile/Scrum, Version Control, Debugging, Frontend Testing, Technical Documentation, Code Reviews, Cross-functional Collaboration

EDUCATION

Computer Programming and Analysis (Advanced Diploma) **May 2024 - Present**
Seneca Polytechnic, Toronto, ON

Computer Software (Diploma) **June 2023 – December 2023**
Indira Gandhi Industrial and Vocational Training Centre, India

WORK EXPERIENCE

Frontend Developer Intern (React) **May 2025 – September 2025**
Vosyn Inc., Etobicoke, ON

- Developed responsive, reusable React.js components using HTML5, CSS3, JavaScript, and Tailwind CSS.
- Built user-friendly interfaces following modern frontend development best practices and responsive design principles.
- Integrated REST APIs to retrieve and display dynamic application data.
- Optimized frontend rendering and application performance, improving user experience across multiple screen sizes.
- Debugged frontend functionality, resolved UI issues, and collaborated with backend developers to deliver reliable application features.
- Participated in Agile sprint planning, peer code reviews, Git-based version control, and technical discussions.

Full-Stack Software Developer Intern **September 2025 – January 2026**
NeedList.ORG (NLO), Toronto, ON

- Developed responsive web application features using JavaScript, HTML, CSS, Node.js, and Firestore.
- Designed and integrated REST APIs to enable seamless frontend-backend communication.
- Debugged frontend and backend issues, improving application performance and reliability.
- Collaborated in Agile sprint cycles, contributing to feature planning, testing, documentation, and code reviews.
- Maintained clean, reusable, and scalable code using Git version control.

QA & Technical Support **May 2026 - Present**
Pocketride Inc., Toronto, ON

- Performed end-to-end testing of web and mobile applications, validating user registration, authentication, ride booking, payment processing, and overall application usability.
- Identified, reproduced, documented, and tracked frontend defects, UI inconsistencies, and functional issues using structured QA processes.
- Collaborated with Product, Operations, and Engineering teams to troubleshoot application issues and improve overall user experience.
- Investigated login, payment, GPS, and workflow-related issues while assisting end users with technical troubleshooting.
- Managed customer support tickets through HubSpot, documented issue resolution, and escalated application defects to development teams.
- Created QA documentation, test reports, and workflow validation processes to improve software quality.

PROJECTS

Hotel Reservation System [https://github.com/Shubham24065/hotel-reservation-system **]**

- Developed a responsive desktop reservation management system using JavaFX, Hibernate/JPA, and object-oriented design principles.
- Designed reusable UI components and implemented booking, billing, authentication, and reporting modules.
- Applied multiple software design patterns to improve scalability and maintainability.
- Integrated secure authentication using BCrypt and implemented application activity logging.

Twitter Clone Project [https://github.com/Shubham24065/Twitter-Clone | https://twitter-clone-b2cq.onrender.com**]**

- Developed a responsive full-stack social media application using React.js, HTML5, CSS3, JavaScript, Node.js, and Express.js.
- Designed reusable frontend components and integrated REST APIs for dynamic content rendering.
- Implemented authentication, post creation, user interactions, and responsive layouts across desktop and mobile devices.
- Improved application performance through debugging, component optimization, and code refactoring.
- Managed project source code using Git and GitHub.
